HCCR RV Products and our partner **OSW** (Our Steel Works) has distinct manufacturing competence in Iron and Steel Fabrication (commercial and residential).

Building our RV decks and stairs fits into our expertise and we work together as a team. We unveiled our new Deck and Stairs product line in March of 2012 at the Good Sam Rally RV show. We now have our units in most of the states plus Canada. Both Bill Wisher (owner of OSW) and Len Hofmann (owner of HCCR) share the same passion on providing a quality product that is affordable and provides a needed service to the RV industry. Our products improve customer safety and extend the RV lifestyle for customers and their pets that require safer entry and exit to their RV's. Bill and Len also want to provide the best customer service possible by being hands on and dealing direct with our customers. Our business model is factory direct to customer and our product design model is modular scalable components.

Our product line is :

1- StairSafe deck models with two standard deck sizes (40x40 & 40x60) heights of 21 inches to 35 inches. The stairs can be set up as center, left or right side entry. Assembly time is less than 5 minutes.

2- StairLite models- These use the same stairs as our deck models but have no deck. These are all center entry and assemble in 3 minutes or less.

We have many sizes, options and accessories. Our modular design allows for total scalability from a small 2 step stairlite to units with multiple decks and stairs. Pet friendly was also not a design afterthought. We have kennel with lockable gate, pet ramps. Depending on your need we have models and options that will provide you the most cost effective, high quality and safest access to your RV. They are free standing, portable, fast assembly and simple to store.
